Notre Dame brûle: 1 milliard de dons et les médias en parlent pendant 2 mois.

La forêt amazonienne brûle: pas de dons, pas de couverture médiatique alors que c'est le cœur de notre planète et le poumon vert de notre planète.

what you need to know about the Amazon rainforest fires

- The Amazon Rainforest is burning at a record rate, with fires burning in 10,000 km² of the rainforest in 2019.
- The National Institute for Space Research (INPE) has recorded more than 68,000 fires in the Amazon since January 2019.
- The Amazon is often the first to appear in the news, but it is often the last to be mentioned in the news.
- The Amazon is often the first to appear in the news, but it is often the last to be mentioned in the news.
